SKILLS

- **Languages**: Python, C, C++, Java
- **Frameworks**: HTML and CSS, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
- **Tools/Platforms**: MySQL, Power BI, Microsoft Excel, VS Code, Jupyter Notebook
- **Soft Skills**: Adaptability, Leadership, Strong Communication, Public Speaking, Continuous Learning

PROJECTS

Heart Disease Prediction Model (Machine Learning Classification System | GitHub) July 2025 - August 2025

- Built an early-risk detection system using machine learning to support preventive healthcare insights.
- Used Python for preprocessing, feature selection, and Logistic Regression as the primary training model, evaluated using accuracy and classification metrics.
- Produced a functional prediction model demonstrating real-world potential in supporting medical decision-making and risk analysis.

Shark Attack Analysis (Exploratory Data Insights | Github) April 2025 – May 2025

- Analyze global shark attack patterns, trends, demographics, and fatality factors using data-driven insights.
- Built using Python with Pandas, NumPy, Seaborn, and Matplotlib for data cleaning, preprocessing, visualization, and statistical analysis.
- Extracted insights identifying high-risk regions, temporal trends, fatality causes, and demographic impacts useful for marine safety and research.

LYRA (AI-Powered Desktop Assistant | GitHub) February 2025 – April 2025

- Develop a smart assistant capable of improving productivity through automation and natural language interaction.
- Developed using Python with speech recognition, text-to-speech, automation libraries, and integrated APIs for search and task execution.
- Resulted in a functional personal assistant that enhances workflow efficiency and demonstrates real-world AI automation capabilities.

TRAINING

Advance Python for ML & AI | CSE Pathshala | Certificate June 2025 – July 2025

- Covered Advanced Python for Machine Learning, including NumPy, Pandas, Matplotlib, Scikit-learn, data preprocessing, feature engineering, model training, and evaluation.
- Built a Heart Disease Prediction model using Python on Jupyter Notebook, implementing EDA, data cleaning, feature engineering, and Logistic Regression classification.
- Evaluated model performance using accuracy score, demonstrating practical application of ML techniques.

CERTIFICATES

- Fundamentals of Machine Learning and Artificial Intelligence | AWS Training | Link — November 2025
- Advanced Python for ML & AI | CSE Pathshala | Link — August 2025
- GenAI Fundamentals | Disha | Link — June 2025
- RCS Capture the Flag (RCSCTF24) | Encrypt Edge | Link — March 2024

ACHIEVEMENTS

- **One among Dean's top 10% students at University**: November 2025
  For good academic performance and extra-curricular activities at University.
- **Selected for Smart India Hackathon'25 (University Level):** September 2025
  Contributed to problem analysis, prototype building, and idea development
- **Hacker Rank Certified: Python (5 star):** March 2024
  Validated excellence in python programming
- **Participated in Republic of Cyber Sentinels CTF Hackathon (24 Hour)** January 2024
  Gained Hands-on Cyber security experience by solving real-time challenges

EDUCATION

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 8.77*** *Since August 2023*
- **Greenfields Public School** Delhi, India
  Intermediate; ***Percentage: 73%*** *April 2022 - March 2023*
- **Greenfields Public School** Delhi, India
  Matriculation; ***Percentage: 92%*** *April 2020 - March 2021*
