Github: https://github.com/Gaurikabhatt27
Email: gaurikabhatt27@gmail.com
Mobile: +91 7011149183

SKILLS

Languages:	Python, C, C++
Web/Frontend:	HTML, CSS, Tailwind (Basics)
Tools/Platforms:	MySQL, Power BI, Microsoft Excel, VS Code, Jupyter Notebook
Data Science & ML:	Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, EDA, Model Evaluation
Backend & Databases:	Node.js, Express.js, MongoDB, MySQL
Tools & Platforms:	Power BI, Microsoft Excel, Jupyter Notebook, VS Code, Git & GitHub
Core Concepts:	Object-Oriented Programming (OOP), Data Structures & Algorithms
Soft Skills:	Adaptability, Leadership, Strong Communication, Public Speaking, Continuous Learning

PROJECTS

EchoChamber – Real-Time Debate App | FE • BE • Live | *React, Node.js, Express, MongoDB* *Jan' 26 – Mar' 26*

- Built a real-time debate platform enabling 1v1 duels and community-driven discussions, enhancing interactive user engagement.
- Developed a full-stack scalable application using React, Node.js, Express, MongoDB, and Socket.io for seamless live communication.
- Integrated AI-powered moderation using Google Gemini API to ensure safe and high-quality discussions.
- Implemented JWT-based authentication and dynamic UI with Tailwind CSS & Recharts, improving security and user experience.
- Designed a modern, responsive interface, boosting real-time interaction efficiency and platform usability.

Heart Disease Prediction Model | Github | *Python, Machine Learning (Logistic Regression)* *Jul' 25 – Aug' 25*

- Developed an early risk detection system using machine learning, supporting preventive healthcare decision-making.
- Performed data preprocessing, feature selection, and model training using Logistic Regression, improving prediction reliability.
- Evaluated model performance using accuracy and classification metrics, ensuring robust and interpretable results.
- Delivered a functional predictive model demonstrating real-world applicability in medical risk analysis.

LYRA – AI-Powered Desktop Assistant | Github | *Python, Speech Recognition, NLP APIs* *Feb' 25 – Apr' 25*

- Developed an AI-powered desktop assistant to automate tasks and enhance productivity using natural language interaction.
- Implemented speech recognition, text-to-speech, and API integrations for task execution and real-time responses.
- Enabled functionalities such as application control, web search, and voice commands, improving workflow efficiency.
- Built a functional assistant demonstrating real-world AI automation and human-computer interaction capabilities.

TRAINING

Advance Python for ML & AI | CSE Pathshala | Certificate June 2025 – July 2025

- Covered Advanced Python for Machine Learning, including NumPy, Pandas, Matplotlib, Scikit-learn, data preprocessing, feature engineering, model training, and evaluation.
- Built a Heart Disease Prediction model using Python on Jupyter Notebook, implementing EDA, data cleaning, feature engineering, and Logistic Regression classification.
- Evaluated model performance using accuracy score, demonstrating practical application of ML techniques.

CERTIFICATES

Google AI Fundamentals | Google | Link	March 2026
Fundamentals of Machine Learning and Artificial Intelligence | AWS Training | Link	November 2025
Advanced Python for ML & AI | CSE Pathshala | Link	August 2025
GenAI Fundamentals | Disha | Link	June 2025

EDUCATION

Lovely Professional University Punjab, India
Bachelor of Technology - Computer Science and Engineering; ***CGPA: 8.74*** *Since August 2023*

Greenfields Public School Delhi, India
Intermediate; ***Percentage: 73%*** *April 2022 - March 2023*

Greenfields Public School Delhi, India
Matriculation; ***Percentage: 92%*** *April 2020 - March 2021*
